Final rejection

Response to the applicant's argument

Applicants argument with respect to original claims 1-19 filled on 01/11/04 have been fully considered but they are not persuasive. Therefore, the response in office action paper number 3 stands active.

Response to remark pages 8-11, the applicant argues that claims 1-6 are not directed to an algorithm or programs but a method of interleaving data for turbo codes and the steps may be implemented in an application specific integrated circuit or in a digital signal processing. Although, the claims interpreted in light of the specification, limitations from the specification are not read to the claims. For example: an interleaving method for interleaving data in a communication system employing turbo codes (as in page 1 line 12 and 13) ". See *in re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Further, the applicant argues that Eroz et al. teach column permutations that are applied on a row-by- row basis while the applicant teach bit-reversing the rows indices to reorder the rows and bit reversing the column to reorder the columns and shifting each row. Unlike the assumptions of the applicant, the examiner believes that the interleaver (permuting system) of Eroz teach a permutation arises from bit reversal indexing and input data are written row by row then row and column permutations are performed and further data read out to column by column positions (see col. 9, lines 7-17). Therefore, argument has been considered but found not convincing.

Furthermore, the applicant argues that Eroz does not teach bit reversing row indexes or number of rows and permuting data. However, this argument is most since Eroz teaches a

method of re-ordering rows according to a bit reversal on row index and permuting the rows (see col. 11, lines 53-56 and col. 12, lines 10-18). Therefore, in light of the above, the final rejection holds strong in view of the recited reference.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 1. Claims 7-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eroz et al. (U.S. PN: 6,333,197).
- 2. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Application/Control Number: 09/775,950

Art Unit: 2133

A shortened statutory period for reply to this final action is set to expire THREE

Page 4

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the mailing

date of this final action.

Conclusion

3. Any inquiry concerning this communication or earlier communication from the examiner

should be directed to Esaw Abraham whose telephone number is (703) 305-7743. The examiner

can normally be reached on M-F 8-5.

If attempts to reach the examiner by telephone are successful, the examiner's supervisor,

Albert DeCady can be reached on (703) 305-9595. The fax phone numbers for the organization

where this application or proceeding is assigned are (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 305-3900.
